PROFESSIONAL SUMMARY

Recent Information Technology graduate with experience in data validation, business process analysis, system testing, and cross-functional collaboration. Strong analytical and problem-solving skills with a solid foundation in databases, reporting, and business applications. Currently building knowledge of SAP ERP and business processes and seeking an entry-level SAP Functional Consultant role where I can contribute to improving business processes while continuing to develop my SAP expertise.

INTERNSHIP EXPERIENCE

E-Science Corporation, QA Intern

December 2025 – May 2026

- Maintained and validated Power BI and Power Apps dashboards by analyzing reports and investigating data inconsistencies using MySQL, improving the accuracy and reliability of business reporting.
- Performed data validation and analysis using Python to ensure business data accuracy and support reliable decision-making.
- Validated application functionality and business data through API and database testing, ensuring system reliability and data integrity.
- Collaborated with cross-functional teams to execute functional, regression, and User Acceptance Testing (UAT), identify defects, and support timely issue resolution with developers, contributing to the successful delivery of reliable software.

EDUCATION

Bachelor of Science in Information Technology

August 2022 – July 2026

Specialization in Mobile and Web Applications

National University – Mall of Asia Campus

- Graduated Summa Cum Laude
- Consistent Dean's First Honor Lister (2022–2026)
- Doña Miguela M. Jhocson Blue Scholar (2023–2026)

TECHNICAL SKILLS

- ERP & Business Applications: SAP ERP (Fundamentals – Currently Learning), Power BI, Power Apps
- Business Analysis & Testing: Requirements Analysis, Functional Testing, Regression Testing, User Acceptance Testing (UAT), API Testing (Postman)
- Database & Data Management: SQL, MySQL, Data Validation
- Data Analysis & Reporting: Excel (PivotTables, XLOOKUP, Charts), Python (Pandas, NumPy)

PROJECTS

eBarrio: A Mobile and Web Barangay Management and Disaster Response System

- Led the development of a MERN Stack-based Barangay Management and Disaster Response System by coordinating project planning, collaborating with the development team, and contributing to frontend development. Analyzed business requirements and designed digital workflows for resident management, household records, document requests, blotter reporting, AI analytics, and disaster response processes.

Attendance Monitoring System

- Developed a mobile-based attendance monitoring system with database integration to automate attendance recording, tracking, and report generation, improving accuracy and efficiency in attendance management.

Hotel Reservation System

- Developed a Java-based desktop application with database integration for room booking, reservation management, and customer record tracking.

CERTIFICATIONS

- IT Specialist Cybersecurity – Issued by Certiport, April 2026
- IT Specialist – Databases – Issued by Certiport, April 2026
